

## PHASE 1 – BRIEF & WIREFRAME

Objective: The project is a portfolio in a hybrid mobile application to present my project and myself.

- Techno:
  - Angular 2
  - Ionic Framework
  - Apache Cordova
  - Node.js
- naming convention: Snack case, English (obviously...)
- Project organization:
  - GitHub: [github.com/ali-loup-acs/alij-portfolio](https://github.com/ali-loup-acs/alij-portfolio)
  - database: alij\_portfolio
  - ftp name folder: alij-portfolio
  - folder structure later...
- Ideas:
  - I want to create an enigmatic portfolio where all information is encrypted or hide by default and the user need to answer questions to be able to decrypt or display information...
- Elements:
  - WHO AM I?
    - Introduction of myself
      - Personal information
      - Goals in life
  - SKILLS:
    - Language
    - Techno
  - BACKGROUND:
    - courses
  - PROJECTS:
    - Date
    - Description

Portfolio  
ENIGMATIC
